

CRITICAL INFORMATION SUMMARY

Home phone and Metro ADSL 100GB

Information about the Service

This is a high-speed internet service which is delivered using broadband technology over your standard copper telephone line. When the nbn™ network is available in your area, you agree Dodo will transition your service/s to the nbn™ network as soon as we are reasonably able to do so.

Before we change your access type, we may contact you to let you know and then either confirm any further details we require for the transition or transition you automatically. You must reasonably cooperate with us to transition your services to the NBN™. If you do not provide information, or reasonable assistance to us, we may not be able to provide you your service. Once upgraded, you will not be able to return to your previous service. Where additional work is required to transition your services (such as non-standard installation) to the NBN™ you may be charged an additional fee, however only where we have agreed this with you beforehand.

Bundling Requirements

In order to receive this service you are required to bundle both a home phone and a broadband service with Dodo.

Equipment Required

For your internet service you need a compatible modem and telephone handset. You may buy a modem outright from Dodo or opt for a Dodo supplied modem at \$0/month. The supplied modem must be returned if your service is cancelled. A nonreturn fee (\$109) applies 30 days after cancellation if not returned. See website for current charges. Modem may be refurbished. Pick up hardware from Dodo (Clayton, Victoria) or have delivered for \$24.90 (Postage & Handling).

Minimum Term

1, 12 & 24 Months

Included Data

Your plan includes the following data:
100 GB anytime

Service Availability

The service is not available in all areas and the service speed you experience depends on a number of factors, including your equipment, the quality and location of your line, and the applications that you are using. Wherever possible, we will attempt to provision the service on the highest possible speed.
